## Finalising Vanuatu's NDC Implementation Roadmap and MRV Framework

Feb 22, 2019

**A Validation Workshop** on Vanuatu's Nationally Determined Contribution (NDC) Implementation Roadmap & Monitoring, Reporting and Verification (MRV) Framework was organized by the Ministry of Climate Change (MoCC) on Wednesday February 20, 2019 at the Meteo Conference Room.

The workshop was well attended by key stakeholders from the two power utility companies, the private sector, key government departments and the non-government organisations.

It aims to assist the MoCC validate the draft roadmap to develop the best approach to achieve its NDC energy sector targets and an MRV tool to track progress of the mitigation actions.

In his opening statement, MoCC Director General (DG) Jesse Benjamin, emphasised the importance of finalising the NDC Implementation Roadmap.

“The NDC Implementation Roadmap and the MRV Framework will be a key policy document for Vanuatu in achieving its mitigation obligations under the Paris Agreement,” he stressed.

The Government, through the MoCC DG expressed its gratitude to the United Nations Development Programme (UNDP) for the funding support in developing the NDC Implementation Roadmap and MRV Framework.

The MRV Framework and the NDC Implementation Roadmap is being developed with technical support from Subbarao Consulting Services (SCS) and Energy Changes.
